

Enhances the user experience when navigating MicroStrategy Report Services™ dashboards with related content without losing selections. Create applications that maximize the end-user experience by automatically providing a customized dashboard view for every user.

FEATURES

- Retains user selections across dashboard selectors
- Defaults time-based selector elements based on transformed system date
- Default selector values can be set per user or group
- Pass single or multiple values between dashboards
- Plug-in deployment; up and running in minutes
- No training required
- High-performance

Contact Etico to help you identify a MicroStrategy based solution that is right for your company.

USE CASES

- Allows selections to apply to all dashboards within user session
- Increase user efficiency by always presenting the most relevant data first
- Gain granular control over dashboard security without the need for security filters
- Create meaningful workflows that retain analyst focus by maintaining context
- Preselect elements, simplifying dashboard usage
- Use MicroStrategy Report Services™ and EasyNav to create "mini" applications
